## Company Profile

### **Introduction**

Otak Construction initiated its activity in 1978 and is considered the first company in this field inside Egypt and the Arab world, and its first project was to cover the track of the athletics field in Cairo Stadium with synthetic flooring in 1979 and then covered all stadiums of the Arab Republic of Egypt in cooperation with the Supreme Council for Youth and Sports.

Otak Construction is considered one of the largest and oldest contracting companies specialized in the field of constructing and developing sports stadiums, clubs and recreational areas. Otak Construction was established in the late seventies, and today the company has become one of the leading and specialized companies in the field of integrated sports contracting (integrated buildings - sports halls - swimming pools - synthetic floors - irrigation and drainage networks - electrical networks).

The company imports all its products from major international companies accredited by the International Sports Federations, for example: IAAF (International Athletics Federation), FIFA (International Football Association), FIBA (International Basketball Association), FIH (International Hockey Federation), ITS (International Tennis Federation).

The company guarantees the quality of its products through warranty certificates and through long-term maintenance contracts that we provide to the customer. The company also has technical expertise including engineers and technicians with distinct experience in the field of implementation and maintenance with the aim of fully carrying out the work and providing a distinguished after-sales service.

## **Flooring**

When it comes to competition, Sport and Leisure venues, we know that the safety and comfort of your players is your top priority. We have a complete range of floor coverings to cover your requirements without compromising on the style and visual impact of your facility.

OTAK Construction can develop any facility by offering innovative and beautifully designed flooring products delivering long life and consistent high quality. We have a wide-ranging product offer including Polyurethane Flooring (Tartan), Acrylic Flooring, Artificial Turf, Natural Grass, Vinyl Flooring, Clay Courts, and finally Wood Flooring systems.

## **Services**

OTAK Construction have years of experience in sports construction and can supply a wide range of services for your new sports facility. We have been involved in a wide variety of construction projects from premier league football pitches to school fields and racecourses, all of which have been completed to the highest possible standard.

Boasting a long list of established sports clients, ranging from local authorities, schools and amateur sports clubs to professional clubs, OTAK Construction is highly acclaimed in sports facility construction. Essentially, whoever you are and at whatever stage your construction project is at, we are confident we can help.
